Problems that occurred

- LOTS of Data
- Incomplete Data
- Intricacies of Google Maps
- Data Duplication, Redundancies

Take Aways

- Google Maps is user friendly, but has limited functionality.
- People can put whatever they want on LinkedIn
- Future maps could be much prettier and more informative using a different mapping software.

What is Next?

- Contact Association of Former Students and try to create a “Where Are They Now?” map for all alumni
